

DH-18-20 Room Dehumidifiers

DF-18 model dehumidifiers are portable dehumidifiers for small spaces. According to the water tank, the moisture taken can be kept in the device or the drain line can be connected to a fixed line. With the humidity level indicator, the instantaneous humidity of the space can be monitored and the desired humidity level, fan speed and timing settings can be made via the control panel.

Model	DH-18
Code	45400018
Dehumidification Capacity	18 liters/day (30°C and 80% relative humidity)
Air Circulation	250 m³/h (2-stage)
Operating Temperature	5°C to 32°C
Power Consumption	220 W (220V/50Hz)
Water Tank Capacity	1.6 liters
Weight	10.5 kg
Measures	290 x 275 x 470 mm (W x L x H)

Model	DH-20
Code	45400020
Dehumidification Capacity	20 liters/day (30°C and 80% relative humidity)
Air Circulation	180-240 m³/h(2 stages)
Operating Temperature	5°C to 38°C
Power Consumption	280W (220V/50Hz)
Water Tank Capacity	6 liters
Weight	15 kgs
Measures	370 x 255 x 615 mm (W x L x H)

DH-50 Room Dehumidifiers

DH-50 model dehumidifiers are produced portable for medium-sized (80-160 m3) areas. It can be used for daily and commercial purposes. The drain line of the device can be connected to a fixed drain line. Thanks to the humidity level indicator, the instantaneous humidity of the area can be monitored and the desired humidity level, fan speed and timing can be adjusted via the control panel.

Model	DH-50
Code	45400050
Dehumidification Capacity	50 liters/day (30°C and 80% relative humidity)
Air Circulation	780 m³/h(2 stages)
Operating Temperature	5°C to 38°C
Power Consumption	850 W (220V/50Hz)
Water Tank Capacity	6 liters
Weight	26 kgs
Measures	360 x 440 x 630 mm (W x L x H)
