

The BUH series is specially designed for use in hot water systems. They are conveniently placed at the bottom of kitchen furniture, reception desks, shop windows, and even stairwells.

The BUH heats up a room much faster than a conventional radiator several times its size and does not take up space in front of the walls.

- Maximum heating 2.0Kw (6824 Btu/hr)
- Fan speed adjustment
- Automatic thermostat that shuts off the fan at low temperature
- Cool air circulation with fan only
- Stainless steel, white or brown panel options
