

PHM series heaters are devices with analogue on-off control. The environment where the desired temperature can be adjusted manually is on the thermostat-controlled device.

Properties

- 750W to 2000W input.
- Frost protection mode.
- The ambience thermostat on the device is +0.5 °C.
- Thermal safety cut out.
- Consumption indicator switch.
- IP2X protection class
- Powder coated RAL 9010 steel structure
- 1.5-meter cable
- Wall mounting bracket

Model	Input Power	Voltage (V)	Dimensions (mm)	Weight (kg)	Code
PHM-075 M	750W	230	410x410x80	5	60060758
