

## DH-90 Room Dehumidifiers

DH-90 model dehumidifiers are portable dehumidifiers for medium-sized (300 m<sup>3</sup>) areas. It can be used for daily and commercial purposes. The drain line of the device can be connected to a fixed drain line. Thanks to the humidity level indicator, the humidity of the area can be monitored and the desired humidity level, fan speed and timing can be adjusted via the control panel

Model	DH-90
Code	45400090
Dehumidification Capacity	90 liters/day (30°C and 80% relative humidity)
Air Circulation	1200 m <sup>3</sup> /h
Operating Temperature	5°C to 38°C
Power Consumption	1200 W (220V/50Hz)
Weight	55 kg
Measures	420 x 480 x 960 mm (W x L x H)

## DH-150 Room Dehumidifiers

DH-150 model dehumidifiers are portable type devices used in industrial processes, large volume areas such as warehouses or indoor swimming pools. It can be used for daily and commercial purposes. The drain line of the device can be connected to a fixed drain line. Thanks to the humidity level indicator, the instantaneous humidity of the space can be monitored and the desired humidity level, fan speed and timing can be adjusted via the control panel.

Model	DH-150
Code	45400150
Dehumidification Capacity	150 liters/day (30°C and 80% RH)
Air Circulation	1500 m <sup>3</sup> /h
Operating Temperature	5°C to 38°C
Power Consumption	2200 W (220V/50Hz)
Weight	74 kg
Measures	500 x 600 x 1100 mm (W x L x H)
