

UFO HP-6 Saturnus has an attractive design and is available in white as standard. The fan is mounted on the side wall and the sound which is already low is also moved upwards. The moisture from the specially developed aircraft-shaped unit is quickly absorbed at a short distance.

There are 2 types of UFOs to be radial and axial. In general, the radial version is used and installed 6-8 m high. The axial version is ideal for large and high lounges. Moisturizers are wall types and aerosols fall into the air with strong force.

The capacity of the device is from 171/h up to 481/h. It is usually used 171/h for rooms up to 7 meters in height. More than 7 meters height 241/h capacity devices are used

Ufo is made of high-quality plastic and stainless steel. In addition, production is available according to your RAL code.

Technical Specifications

Code	
Dimensions (diameter x height) mm	Ø570x190
Weight (kg)	5
Power Consumption (W)	68
Standard nozzle capacity (l/h)	2,7
Standard number of nozzles	6
Recommended water hardness (dH)	0-4
Water conductivity (µs/cm)	10-150
Control Unit	Jet control
Material	Plastic housing and stainless-steel nozzle and bracket
Min. Mounting Height (m)	3,5
Min. zone for evaporation (m)	3,5
Water temperature (°C)	0-80
Min.-Max. Ambient Temperature (°C)	0-80
