

Ultrasonic Humidifiers with Fan

This type of ultrasonic humidifier is specially designed for salad bars, cheese, fish, flowers, vegetables, meat aisles and all large-surface production processes (textiles, etc.) that require small tolerances. The aerosol fog produced is delivered to the desired places by distribution pipes.

- This type of ultrasonic humidifier can be on/off control or proportional controlled.
- Each output can be controlled with a potentiometer for individual control.

Capacities, Electrical Specification, Dimensions and Weights

Model	Capacity (kg/h)	Voltage (V/Hz)	Electricity consumption (VA)	Weight (kg)	Dimensions H/L/W (mm)	Code
UB/P8	4.0	48/50	310	12	180/550/270	40104501
UB/P-D8	4.0	48/50	310	12	180/550/270	40104503
