

XTP Series electrode steam humidifiers from DriSteem's provide humidification for a wide range of buildings, including health care, commercial, industrial, and government facilities. Easy installation and minimal maintenance make XT Series one of the most affordable humidification systems to purchase and install.

XTP-E series steam humidifier specifications

- Each unit capacity is 2-130 kg/h and 4 units can be connected together to increase the capacity up to 520 kg/h.
- Disperses steam into ductwork or open spaces.
- Works with water conductivity from 125-1250 $\mu\text{S/cm}$.
- Easy to replace steam cylinder
- Compact in size to fit into small spaces with attractive cabinet for finished space applications.
- Possibility for updating program and save datas with USB port.
- Modbus and optional BACnet or LonTalk for inter-operability with multiple building automation systems.
- Automatic drain and fill events for optimized humidifier performance based on water

Vapor - 4 control panels

Capacities, Electrical Specification, Dimensions and Weights

Model	Max. power (kW)	Max. steam capacity (kg/h)	Full load current (Amps)			Shipping weight (kg)	Max. operating weight (kg)	Dimensions (mm)			Code
			1 Phase		3 Phase			Width	Height	Depth	
			240 V	480 V	480 V

* XTP models are controlled by a Vapor-Logic controller.

** For circuit building requirements, please contact our company for XT Series installation, application and maintenance manual.

*** These models have 2 steam cylinders and require an independent steam connection.

XTP-E Series Humidifier Parts

XTP-E Steam Distribution Fan

- Suitable for indoor spaces and rooms without ventilation areas.
- The XTP-E series is mounted on top of the humidifier or on the wall.
- Steam capacity is up to 22.7 kg/h.
